Re: Letter of Support for \$5,000,000 for Zuckerberg San Francisco General Hospital

Dear Senator Feinstein, Senator Padilla, and Speaker Emerita Pelosi:

We write to request your support for \$4,000,000 in funding from the Department of Health and Human Services, Health Resources and Services Administration, Program Management to update and renovate Zuckerberg San Francisco General Hospital's (ZSFG) Family Health Center. Additionally, we write to request your support for \$1,000,000 in funding from the Department of Justice, State and Local Law Enforcement Activities, Office of Justice Programs, Byrne Discretionary Grants for equipment and programming to create a new Children & Adolescent Support Advocacy and Resource Center. Both of these care centers will be part of a seismically retrofitted, newly designed, and state-of-the-art Outpatient Health Center at Zuckerberg San Francisco General.

As you may know, ZSFG moved into its new inpatient hospital building in 2016, vacating a seven-story tower that currently serves as its outpatient clinical center but no longer meets seismic standards. Now, ZSFG wants to retrofit and redesign the building to better accommodate a new wraparound, longitudinal, and preventative care approach to their medical services – highlighted by the Children & Adolescent Support Advocacy and Resource Center and the Family Health Center.

ZSFG designed the new facility to house all outpatient services upon completion, amounting to approximately 500,000 patient visits per year and serving San Francisco's vulnerable population with a distinct set of needs. The hospital's approach aims to expand its care to include social issues such as food and housing, preventative screenings for early identification of health issues, and collaboration

with respective providers as partner. With a new facility designed to execute this approach, ZSFGH will be able to allow care teams to be together, learn from each other, and thus, better serve its patients.

The Family Health Center and the Children & Adolescent Support Advocacy and Resource Center exemplify the commitment to this new wraparound approach. The Family Health Center serves as the primary family health clinic, and an updated Center will provide approximately 15,000 patients with comprehensive care that integrates mental health and other preventative and social services in primary medicine. The creation of the Children & Adolescent Support Advocacy and Resource Center will open a new space that houses specialized professional services for children, adolescents, and their families who have experienced trauma and need acute, wraparound care for healing. These two Centers are central to making ZSFG's new approach to medicine a reality for its patients.

Investment in the new Outpatient Health Center will create cost-saving practices over time by better supporting the hospital's ability to provide preventative wellness services. Routine, preventative care helps solve health problems or finds them before they result in costly inpatient services. An upgraded Outpatient Health Center reduces the likelihood that the number of inpatient beds or the emergency department's size will become rate-limiters in ZSFG's ability to deliver care. Access to preventative services reduces the likelihood that patients leave chronic diseases untreated until it becomes a crisis.

ZSFG has been on the frontline of treating California's neediest population, and investment in the hospital cannot be more critical. Amidst the homelessness and addiction crises, access to quality medical services is imperative, and ZSFG embodies our commitment to health care for all. 92% of ZSFGH's patients are uninsured, under-insured, jailed, unhoused, and/or undocumented. About half prefer to conduct medical visits in a language other than English. One in four families report difficulty with housing; one in six report worrying about not having enough food for everyone in the household. Federal funding will uplift the hospital's commitment to serving our city's neediest at this pivotal time.

The hospital has a long legacy of aiding the community. Opening its doors in 1872, ZSFGH is the city's first public hospital. Since its founding, the hospital has aided thousands in the city during times of need. In 1906, during the Great San Francisco Earthquake, the hospital became the local facility for shelter and care. In 1972, the hospital received its Federal Trauma Care Center and has maintained it ever since. Additionally, in 1981, the first AIDS case was confirmed at SFGH. The hospital opened Ward 58 and Ward 86, the nation's first AIDS inpatient and outpatient clinic respectively, setting the standard for the treatment and care of AIDS. Most recently, the hospital helped steward San Franciscans through the COVID-19 pandemic and provided key services safely during lockdown.

ZSFGH is a model of access to and quality of care for the country. We look forward to the impact this new Outpatient Health Center will have on the well-being of so many lives every day. Thank you for your consideration of our support for San Francisco General Hospital's funding request.

Sincerely,

Scott Wiener
